

CASE STUDY

RISE with SAP - Cloud Transformation for a Manufacturing Giant

Client Overview

A globally recognized manufacturing company with operations in multiple countries, specializing in heavy machinery production.

Business Challenges:

- ❖ Outdated on-premise ERP system leading to inefficiencies and high operational costs.
- ❖ Lack of real-time data visibility across international supply chains.
- ❖ Difficulty in scaling IT infrastructure to support business growth.

The Solution

Informatic Technologies implemented **RISE with SAP**, migrating the client's ERP system to **SAP S/4HANA Cloud**. Our approach included:

- ❖ **Infrastructure Modernization:** Transitioning from legacy systems to a cloud-based environment.
- ❖ **Automated Data Migration:** Ensuring accurate and efficient transfer of historical data.
- ❖ **Advanced Analytics & Reporting:** Implementing real-time insights into supply chain operations.
- ❖ **Custom Training Program:** Equipping the client's team with the necessary skills for system adoption.

Implementation Strategy:

-  Conducted a **comprehensive business assessment** to align SAP solutions with long-term goals.
-  Executed a **phased migration approach** to minimize operational disruptions.
-  Provided **continuous post-go-live support** to ensure smooth adaptation.

Key Results:

-  **30% reduction in operational costs** due to lower infrastructure expenses.
-  **Improved system agility**, allowing for seamless business expansion.
-  **Enhanced supply chain visibility**, reducing production delays by **40%**.
-  **99.9% system uptime**, ensuring uninterrupted business operations.
