

CASE STUDY

Grow with Infor ERP & Factory Track – Optimizing Wholesale Distribution

Client Overview

A growing wholesale distributor aiming to expand operations while improving order fulfillment and warehouse management.

Business Challenges:

- ❖ Inefficient order processing, leading to delayed shipments.
- ❖ Lack of real-time inventory visibility across multiple warehouses.
- ❖ Manual financial tracking slowing down reporting and compliance.

Our Solution:

We deployed Infor LN Distribution to optimize warehouse and supply chain operations:

- ❖ **Advanced Order Management:** Automated order processing to improve fulfillment speed.
- ❖ **Infor Factory Track (Infor Warehousing Solution):** Implemented real-time inventory tracking for better stock management.
- ❖ **Financial Automation:** Streamlined reporting and compliance with integrated financial tools.

Implementation Strategy:

-  Conducted a warehouse assessment to refine logistics processes.
-  Trained staff on new system capabilities for improved adoption.
-  Set up proactive system monitoring for continuous performance optimization.

Key Results:

-  **25% faster order fulfillment**, reducing delays and improving customer satisfaction.
-  **30% reduction in inventory discrepancies** through real-time tracking.
-  **Improved financial reporting accuracy**, ensuring compliance and better decision-making.
