

CASE STUDY

ECC to S/4HANA Migration - Digital Transformation for a Financial Services Firm

Client Overview

A multinational financial services firm dealing with high volumes of transactions and regulatory requirements.

Business Challenges:

- ❖ SAP ECC system nearing **end-of-life support**, requiring an urgent upgrade.
- ❖ Data inconsistencies affecting financial reporting accuracy.
- ❖ Compliance risks due to outdated security measures.

The Solution

Informatic Technologies implemented a **structured migration strategy** from SAP ECC to **S/4HANA**. Our approach included:

- ❖ **Pre-migration Assessment:** Identifying key customizations and potential risks.
- ❖ **Data Cleansing & Standardization:** Ensuring accurate and secure financial records.
- ❖ **Zero-Downtime Transition:** Executing migration with parallel system runs.

Implementation Strategy:

-  Conducted a **3-stage migration approach**, including sandbox testing, pilot rollout, and full deployment.
-  Utilized **SAP Activate methodology** to streamline migration efforts.
-  Established **real-time monitoring and analytics** for financial tracking.

Key Results:

-  **50% improvement in reporting accuracy**, streamlining financial insights.
-  **Zero business disruption**, ensuring continued operations.
-  **100% compliance with regulatory standards**, improving audit readiness.
